

DETOX REVOLUTION: D-Tox 21

"Half of the modern drugs could well be thrown out of the window, except that the birds might eat them." -Dr. Martin Henry Fischer

Product Medical System (Specification):

♠ The commonly accepted average body temperature (taken internally) is 37°C.

D-Tox 21 has the body's cleansing mechanisms, which help to prevent cancer, as soluble and insoluble fibers in vegetables, fruits, and whole grains work throughout our body. Not only does D-Tox21 disperse heat by a medical action, but the product melts and eliminates fat residues and impurities or toxins remaining in the blood vessels and blood through the intestines and the urinary organs.

The Necessity of Detoxification:

♠ Harmful agents gain entry into our body through the skin, the mouth, and the respiratory system. These include health threatening chemicals, combustion by-products, and metals from food, water, and air. These pollutant agents are especially abundant in the urban area, making our immune system gradually drop. Therefore, we can easily get infected by several destructive germs and bacteria from the environmental pollutants.

These toxins in the liver or bloodstream in the large intestine can cause blood circulation disorder, numerous pains resulted from inflammation, abnormal hormone excretion, neurological disorder, cancer, and many degenerative diseases.

We have struggled from quite a few incurable diseases or cancers as we couldn't find what causes us to get sick.

If we couldn't find the cause and the treatment, rather we should focus on detoxification for the treatment of our body! In fact, we can get a remarkable protective effect and treatment against numerous fatal diseases.

We cannot help living without taking these supplements.

That is the reason why we should know the Necessity of Detoxification.

What is Detoxification Treatment?

♠ The toxic load make our body sick, interrupting the circulatory system of blood and energy and resulting in extravasated blood , water toxicity, phlegm all through our body.

Diseases especially resulted from the toxic cargo include atopic dermatitis, asthma, allergic dermatitis, allergic diseases, diarrhea, constipation, shoulder pain, menstrual cramps also known as dysmenorrhea or period pains, pimple, boil, paralysis, and even dementia.

Even if we take healthy food, we may not have some sufficient effects without detoxifying toxins accumulated in our body. We should know that industrial chemicals and metals from water and air, food contamination by pesticide, more than 4000 food additives are threatening our body now a days.

How, then, can we neutralize(detoxify) these toxins?

Our body systems have a powerful natural defense ability against external threats. In our organs liver, kidney, and skin are especially designed to eliminate these toxins. However, excessive exposure to certain poisons in our environment can lead to dysfunction of these our natural detoxification system.

That is why we have struggled from incurable and unknown diseases.

We see patients going to clinic/doctor's office and growing their illness, regardless of their intention to overcome the sickness. It is very frustrating and distressing.

If they have taken long-term medicines, it would lead them to get a medicinal poisoning.

Their stomach and liver due to the long-term medicines cannot have enough function to remove toxins loaded in their body.

If they couldn't find the treatment for the sickness, they should choose detoxification treatment through which they would recover their powerful natural defense ability-a present from Creator -to detoxify all different kinds of poisons/toxins and finally overcome the illness.

What is the Major Toxin Inducing Liver Damage?

♠ In our body system the liver is the most crucial organ involved in detoxification. The liver converts potentially dangerous toxins and excessive hormones into biologically harmless water-soluble compounds.

The major toxin to damage the liver is heavy metals such as aluminum, mercury, arsenic, nickel, lead, cadmium, and etc. These metals have a nasty tendency of building up in our body. Therefore, it is very hard to get rid of them out of our body because of this characteristic.

These toxins accumulate within human brain cells, immune system, and kidney, leading to fatal diseases.

If somebody had fought against an incurable disease, they must have been occupied by these poisons.

For farm produces there are more than several thousands of poisonous pesticide, weed killers, bactericides, growth promoters, artificial growth hormones, and antibiotics legally approved by FDA.

Research has found many chemicals used in farming practices can have a detrimental effect on the human body. For example, pesticides legally used to grow food might have cancer-causing agents (carcinogens) and even heavy metal, such as mercury, can be found in weed killer and agricultural chemicals. It is also surprising to be known dental amalgam includes mercury.

There are abundant heavy metals with which we come in contact throughout our normal daily activities, including the element lead coming from tobacco smoke, combustion by-products, and tap water, aluminum from antacids and utensils, and cadmium from tobacco smoke.

It is very unfortunate and sad for our daily life to be environmentally exposed by the poisonous heavy metals.

Obvious symptoms like headache, buzzing in ears, stomach upset, neurological disorder, powerlessness, pains, memory loss, and dizziness may occur as a result of acute/chronic exposure of those environmental pollutants.

Environmental pollution level and effects on children surpass our imagination; however, most people overlook these dangerous health issues facing them. That is very disappointing.

Mental retardation such as autism, speech impediment found from the stage of infant and child or tic disorders and immune system disorders from adolescent might be caused by heavy metal pollutant like the element lead.

Even a vaccine used for stimulating the body's immune system includes ethyl mercury.

How does D-Tox 21 work?

♠D-Tox 21:

1. Helps **regenerate** somatic cells as well as capillaries.
Helps **activate** the capillaries with cell suspensions.
2. Helps **return** to Normal Blood Pressure for High/Low Blood Pressure by activating the capillary cells (takes 2-3 months).
3. Helps **support** the ability of blood glucose control for Diabetes by supporting the regeneration of the cells in the body (takes 2-3 months).
4. Helps **recover** atopic dermatitis, rhinitis, bronchitis, various kinds of dermatitis by regenerating inactive capillaries (takes 2-3 months).
5. Helps **increase** intestinal peristalsis.
6. Helps **stop taking** drugs, tobacco smoke, and antibiotics
7. Helps **detoxify** heavy metals, agricultural chemicals, and food additives within the body organ
8. Helps **purify** and **cleanse** the blood

Application:

1. Blood Purification
2. Fatty Liver, Chronic Hepatitis, Gout, Arthritis
3. Substance abuse (overuse or multiple use of a drug/use of a drug in combination with alcohol or other drugs)
4. Arteriosclerosis, Stroke, Brain Tumor
5. Hyperthyroid, Hemodialysis
6. Hypertension/Hypotension

7. Insomnia, Cancer (For the cancer patients: Detoxification is essential.)

Active Ingredients:

♠ Silymarin, Ellagic Acid, Allyl Sulfides, Carnosol & Ursolic Acid, Methylsulonyl Methane

Inactive Ingredients:

♠ Peppermint, Gelatin

Matters that Demand Special Attention:

1. **Taboo food:** beef, eel, milk products, and alcohols
2. **for blood type "O":** do not take existing medicines along with D -Tox 21
3. **for blood type "A", "B", "AB":** control depending on the state, whether or not taking the previous one along with D-Tox 21 (takes about 1 week)

Direction:

♠ For General Health Improvement:

Step 1: take 10 capsules daily for three days-5 capsules each on an empty stomach in the morning and in the evening

Step 2: take 6 capsules daily for the remaining treatment- 3 capsules each on an empty stomach in the morning and in the evening

♠ For Treatment of illness (takes 2-3 months):

Step 1: take 10 capsules daily for three days-5 capsules each on an empty stomach in the morning and in the evening

Step 2: take 8 capsules daily for five days- 4 capsules each on an empty stomach in the morning and in the evening

Step 3: take 6 capsules daily for more than 1 1/2 months- 3 capsules each on an empty stomach in the morning and in the evening
