

# HgH - Ingredients

**Somatropinne HgH 250 mg** combines HGH components with L-group amino acids and Growth Factors to provide the highest quality HGH supplement available without a prescription. It is manufactured under stringent quality control standards with the highest quality natural ingredients available.

**ALPHA GPC:** It increases human growth hormone secretion and helps to overcome cognitive disorders. It also assists in processing the nerve impulses responsible for balance and coordination, and contributes directly to improved mental focus.

**GABA:** It improves the plasma hormone levels in the body, and aids in proper neurotransmission. It improves the functioning of the central nervous system, and promotes fat loss. It improves the body's sleep cycle, resulting in a deeper, more restful sleep.

**GLYCINE:** It is a building block of essential proteins, and increases neurotransmission activity of hormones involved in memory and cognition. It also helps to alleviate the symptoms of spasticity.

**L-ARGININE:** 10 mg - Helps in protein synthesis, helpful in cell replication, increases sperm count and potency. It is one of the chemical triggers that stimulate anabolic muscle growth.

**L-DOPA BEAN EXTRACT:** It supports the body's ability to stimulate the natural release of growth hormone. Stimulates increased HGH levels that can be beneficial in stimulating muscle growth through amino acid sparing and promotion of amino acid transport into muscle cells, as well as burning fat from fat cells.

**L-GLUTAMINE:** It helps in metabolism, improves athletic performance, and boosts the immune system. It is a building block source for stomach and intestine lining, and may help to prevent ulcers.

**L-ISOLEUCINE:** In synergy with L-valine it is burned for fuel in the cells to promote muscle recovery. It plays a role in wound healing and the growth of new tissue. It is needed to increase the bio-availability of complex carbohydrate intake and is absorbed by the muscle cells for anabolic muscle building activity. It provides the necessary chemicals for proper muscle growth and neurotransmission.

**L-TYROSINE:** Very helpful in neurotransmission, helps to relieve depression, increases the secretion of melanin in the skin, and acts as a mood support.

**L-VALINE:** It is burned for fuel in the cells to promote muscle recovery. It plays a role in wound healing and the growth of new tissue. It is needed to increase the bio-availability of complex carbohydrate intake and is absorbed by the muscle cells for anabolic muscle building activity. It has a synergistic relationship with L-isoleucine in promoting lean muscle growth.

**L-LYSINE:** It helps in the maintenance of nitrogen balance in the body; it conserves the calcium in the body and assists in the proper maintenance of blood vessels.

**MOOMIYO EXTRACT:** It is effective at preventing age-related hormone dependent disorders; it has anti-inflammatory and healing properties. It is very beneficial at reducing joint soreness of the knees, shoulders and the elbows. It has very good growth-promoting ability.

**ORNITHINE ALPHA KETOGLUTARATE:** It has anabolic effects and improves athletic performance; it has wound healing effects & is immuno-enhancing, aiding the body in disease-resistance. OAG provides a chemical trigger to stimulate new muscle growth by the body.

**Inactive Ingredients:** *Deionized water, lecithin phospholipids, sodium citrate, potassium sorbate, maltodextrin, paraben, and citric acid.*
